ASSIGNMENT - 1

SUBJECT	Mobile Application Development
PROJECT ASSIGNED	Currency Converter App
SUBMITTED BY	Sujal Jain (03317711723)

App Description

Currency Converter App is a sleek and high-performance currency conversion utility designed for modern travelers, digital nomads, and finance enthusiasts. Built with a focus on speed and accuracy, the app can provide real-time exchange rates for over 150 global currencies and cryptocurrencies, ensuring you never lose value during international transactions.

Key Features:

- **Instant Conversion:** A streamlined interface that calculates conversions in real-time as you type, featuring a custom numeric keypad for effortless input.
- **Live Market Rates:** Stay ahead of the market with a dedicated dashboard for live exchange rates, featuring favorited currency pairs for quick reference.
- **Conversion History:** Automatically log every calculation. The history module allows you to track past conversions with precise timestamps, helping you monitor spending trends over time.
- **Interactive UI:** Experience a premium GUI featuring a "layered vector" design, fluid animations, and a modern color palette (Electric Blue & Slate Grey) that ensures high readability and visual appeal.
- **Offline Support:** Travel with confidence as it caches the latest available rates, allowing you to perform basic conversions even when you're off the grid.

App Structure (5-Screen Architecture)

Screen	*Primary Function*	*Key UI Components*
Home	Central hub for quick access.	Dashboard, Navigation Buttons, Logo.
Convert	Real-time currency calculator.	Forms, Dropdowns (Flags), Custom Keypad.
Rates	Live global exchange rate list.	ListView, Search Bar, Favorites Toggle.
History	Log of previous conversions.	RecyclerView, Dismissible List Items, Date Tags.
About	App information and support.	ImageView, Version Info, Social Links.
